

possibilities in every direction

GALLEGA
GLOBAL LOGISTICS

Gallega Global Logistics is an integrated logistics partner that draws on years of experience in creating seamless supply chains for automotive and retail businesses.

Gallega is part of a well established business group, a conglomerate founded in 1994. We have been serving the Group's operating companies with integrated logistics solutions and supply chain engineering for over a decade. During this time, our teams have accumulated a rich portfolio of conversions, experiences and insights in supply chain management that we continue to develop and put into practice.

Today, Gallega is proud to bring its expertise and resources to external partners. Our logistics and supply chain expertise helps businesses reduce cost, improve agility and gain an edge in competitive market. Our facilities in KIZAD and JAFZA free zones in Abu Dhabi and Dubai respectively deliver the yard space, warehousing facilities and access to transport modalities to cater to all your business requirements.

01 project logistics

Edge in speed, reliability and
responsiveness for their supply chains

We help our clients win in competitive markets by giving them the edge in speed, reliability and responsiveness for their supply chains.

Gallega's logistics experts have years of experience in assembling agile networks that keep costs low while making a customized solution based on client requirement

We offer various custom-made solutions for your project needs.

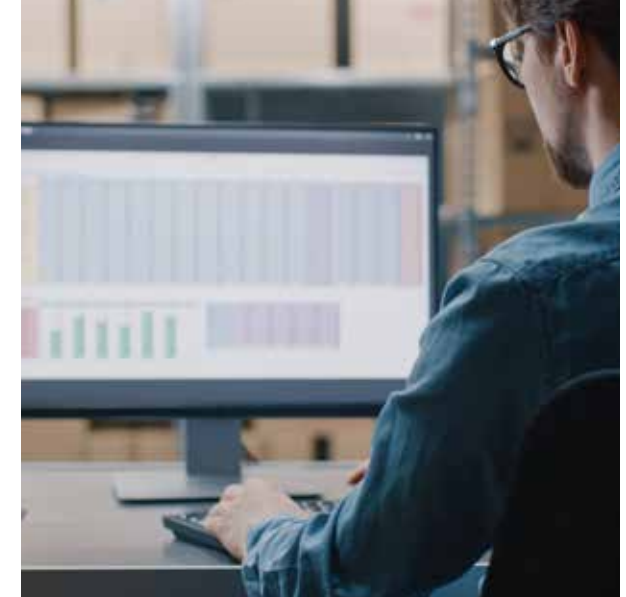

02

contract logistics

Our Supply Chain Specialists help customer's merge their traditional logistics models with supply chain management processes to deliver turnkey customer solutions that manage goods from point of production through value added processes until the final point of sale, keeping costs low while ensuring the right products make it to the shelf at exactly the right time.

We assist global clients with designing and planning supply chains, and facilitate complex operations that include warehousing, processing, distribution, customs clearance and management of inventory. We offer comprehensive support every step of the way so our clients can focus on their core business.

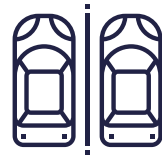

02

contract logistics

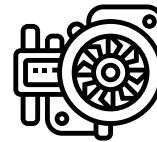

warehouse distribution

Our warehousing and distribution facilities in JAFZA and KIZAD offer our customers flexibility in reaching their markets within the UAE and abroad. The facilities are based within the respective free zones and enabled for a range of products, providing full visibility of inventory through our warehouse management software (WMS) to customers.

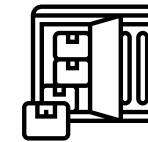

Our warehouses offer a range of storage methods – from palletized storage to shelving and binning – to offer customer's customised storage solutions. Our proximity to land, sea and air routes allows us to offer agile distribution networks for all manners of goods, including fast moving retail inventory, supported by full visibility tools and optimized route management solutions.

02

contract logistics

value added service

Value added activities in the warehouse and the open stock yard provide customers with the ability to change, enhance and consolidate product before distributing to retails and end users. We provide a range of value-added services to meet our customers specific needs and promotional activities.

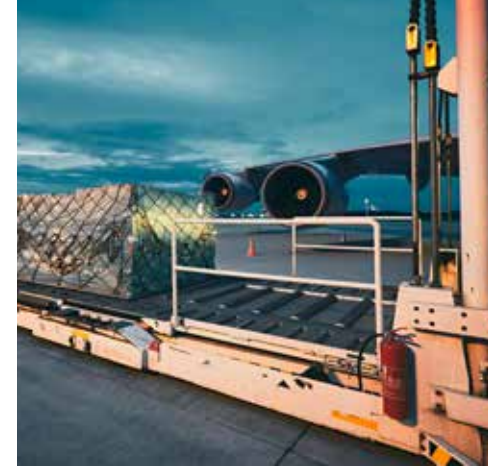

warehouse capabilities

Our KIZAD and Jebel Ali warehouses are tailor made for spare parts, FMCG and other retail commodities. The warehouses are operated by trained personnel and an advance WMS software that allows integration via API's to allow data flow between the customer and our system for inventory planning, management, order placement, inbound and outbound controls and demand planning.

03

freight forwarding

We act as forwarding agents for global brands, and rely on a dense network of transport partners to organise shipments and get goods from manufacturer to market.

From FMCG products to automobiles and even the heavy machinery powering construction projects around the world, we facilitate the movement of a vast variety of goods. We also track shipments, arrange documentation and insurance, book cargo space and negotiate preferential rates for our clients.

sea freight, air freight, land freight

03

freight forwarding

sea freight

With hubs situated in port free zones, our proximity to the sea combines with the relationships we've built with reliable shipping partners and translates into turnkey sea freight solutions for our customers. Our sea freight solutions are designed around client needs and include:

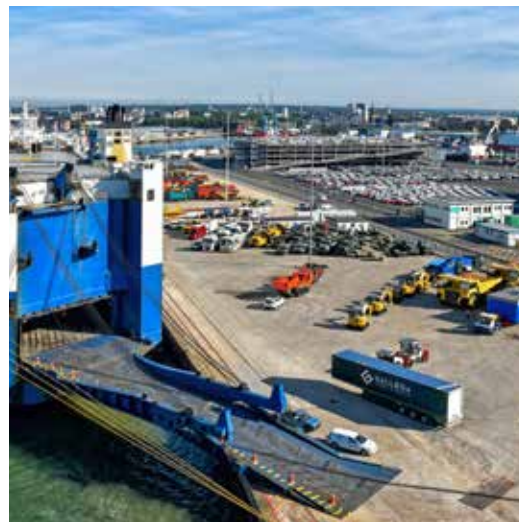

FCL

full container load

LCL

less than container load

RORO

roll-on roll-off

03 freight forwarding

air freight

Gallega Global Logistics partners with the world's leading carriers to catalyse a far-reaching network of air links for time-sensitive cargo. Our air freight team specialises in dispatching cargo swiftly and efficiently by relying on consolidation. Gallega also offers a specialised customer brokerage team that facilitates cargo documentation and clearance at both arrival and departure airports.

land freight

Gallega relies on expert partners to create land transport solutions ranging from consolidation and complex cargo missions requiring multiple vehicles to door-to-door forwarding. Our land transport teams also handle security clearances and documentation for heavy gauge and sensitive cargo as needed.

04

land transport (UAE & GCC)

Gallega relies on expert partners to create land transport solutions ranging from consolidation and complex cargo missions requiring multiple vehicles to door-to-door forwarding.

Our land transport teams also handle security clearances and documentation for heavy gauge and sensitive cargo as needed.

05 supply chain solutions

Creating efficiencies and
increase profitability

We help our clients navigate complex challenges and respond with agility to changing market needs.

Our supply chain solutions help them balance inventories, create efficiencies, and increase profitability. At Gallega, our teams have been designing supply chains for years. Our expertise, and ability to deliver 4PL/LLL services, helps create the harmony, integration and dynamism common to all successful logistics operation. Regardless the size of your business, we can orchestrate your supply chain management functions from start to end by providing innovative and scalable solutions.

06

automotive logistics

finished vehicles logistics

Our facilities in Abu Dhabi's KIZAD freezone and Dubai's JAFZA can store 12,000 vehicles, and are supplemented by facilities in Jordan and Belgium. This network of linked hubs helps us deliver integrated logistics services that enable the automotive sector and help manufacturers and distributors better manage their supply chains.
